V-Plow**

No matter what the conditions, Hiniker professional grade snowplows are ready to help you ***reach new levels of productivity and performance!***

V-PLOWS: Trip-edge designs give smooth operation and effective protection. Double acting cylinders provide positive moldboard position control.

C-PLOWS: Get the heavy-duty performance of the Hiniker trip-edge conventional plow plus the added versatility of a high performance backdrag plow. An amazing time-saver in driveways, parking lots and loading docks.

SCOOP PLOWS: High capacity concave shape captures snow to efficiently clear large lots and parking areas. Angles left or right for conventional plowing.

CONVENTIONAL PLOWS: 30 inch tall high-curvature blades roll deep snow off quickly and efficiently. Commercial plowers will appreciate the extra strength and efficient design.

SPREADERS: Spread ice control materials quickly and easily with an efficient Hiniker Spreader. Long-lasting stainless steel construction. Choose between OHV gas engine or dual-motor electric hopper spreaders, or new stainless steel tailgate spreader models!
